ABOUT ME

New Graduate, Class of 2023. Passionate about utilizing data analytics to make informed business decisions. Seeking to leverage my data analytics skills to make data driven decision and improve corporate performance as a data analyst.

PROJECTS

Health and Disease vs. Household Income

UNIVERSITY OF TORONTO

- `</>` Python -- pandas, matplotlib, seaborn
- Linear regression analysis on median household income and rate of diabetes, high blood pressure and number of mental health counts.

EXPERIENCE

Bookkeeper & Customer Service Agent

METRO INC.

- Create monthly financial reports using BDSM to evaluate store progression
- Track and update monthly invoices/credits within the database (BDMS)
- Supervise & audit up to a team of 5 cashiers daily
- Use past customer transactional data provided by the company's database to schedule cashier shifts for optimal efficiency
